Student_44018504	724-357-2859

Courseware

What suggestions do you have for enhancing the courseware?

Student_44018461	There were several typographical errors through out the text. I would prefer to conduct smaller lab exercises after each lesson to a large lab exercise at the end of the chapter
Student_44018463	Upgrade the course and labs from visual studio 2010 to 2012/2013/2015.
Student_44018472	The exercises in the books could be improved by removing redundant instructions for entering code. The task followed by the steps to complete the task were almost duplicates.
Student_44018480	I would like to see the process of building a website from scratch using C#/ASP.NET from start to finish including the planning and implementation.
Student_44018486	10267A book's examples are somewhat convoluted compared to the 20480B book. There is a clear disparity between the examples of the two books in labs.
Student_44018504	Some of the instructions could be more clear. Even in the detail lab "answer keys," it wasn't readily apparent what was supposed to be done. There were a few typos in the labs as well.

Comments (Courseware):

Student_44018463	Fix mistakes in the lab instructions.
Student_44018504	None

Overall Satisfaction

Overall, how satisfied are you with this training course? (check only one) [Student Data]

Student_37959862	Somewhat satisfied
Student_44018461	Very satisfied
Student_44018463	Very satisfied
Student_44018466	Somewhat satisfied
Student_44018467	Very satisfied
Student_44018468	Very satisfied

Environment

Comments (Environment):

Student_44018461	Department Hardware was used. We did not have access to the virtual environment described in the books.
Student_44018480	Classroom was too cold some of the time. Instructor and students had intermittent technological issues.
Student_44018504	None

Report Recommendations

Interpreting the Report

Below are tips to help you understand the information in the report. For additional information, please click the Help tab above the report.

Summarizes scores from each student for selected question categories and questions; compare and analyze scores for all students that completed evaluations.

Student comments provide additional insight into the scores displayed within the report.

Determine the students' overall perceived value derived specifically from training to proactively manage future training events.

Recommended Actions

Below are recommended next steps to take after reviewing the information in this report. Additionally, you'll find links to automatically run complementary reports for drilling-down further into the data or analyzing the information in another way.

If any learner rated the class much lower than others, and the learner provided an email address, follow up with that person to gather additional feedback regarding the scores. Share that feedback with instructor and course managers as areas for improvement.

If any learner rated the class much higher than others, especially in the areas of job impact or business results, follow up with those learners to gather additional feedback on how they were able to maximize their use of what they learned on the job. Share this feedback with course managers to ensure they share the knowledge with future learners to maximize job impact

and business results.

Schedule this report to be emailed automatically to the course and instructor managers on a daily basis so they are able to review performance on a regular basis.

Recommended Links

Run the Learner Comments report to review all the qualitative feedback for specific approaches to make the learning more effective and impactful.

Run the Quick Question report to summarize the scale-based and multiple-choice answers for all of the evaluations.

Run the Performance to Goals report to view how these results compared to your goals.
