Comments

Instructor

Instructor Comments (if any):

Student_23150686	I enjoyed this class. Mr. Umphrey is the best instructor I have had so far at this location. Presentation was good. Course stayed on topic. The course moved at a good pace, and adjusted to the skill level of the students. Instructor's presentation stayed on topic and provided good additional links and information.
Student_23150848	He didn't really share any real-world experiences, but it was covered in the coursework pretty thoroughly.

User Information

Student_23150848	500 or more PCs

Courseware

	How would you change the training content to improve your learning experience?
Student_23150686	There were a lot of typos and miss-spelled words. The instructor had a list of corrections that helped address them, but there were a lot more. My coworker had a lot of difficulty because of it. The instructor was quick to address the problems when they were brought up.
Student_23150848	It needed to be proof-read! There were many typos, inconsistencies, and wrong directions that had to be corrected by our instructor. I am very familiar with SharePoint, so I didn't have too much trouble and could usually spot when there was a typo, but other students in the class had trouble at times.
	Other training content comments (if any)
Student_21079976	Can include more technical details about the topics instead of just focussing on exercises
Student_23150726	I was expecting that this course also covered workflows since it's a big part of Business Intelligence
Student_23150848	There could be more information printed in the book along with the slides. The slides are very generic and then there is no further information except what was given by the instructor. This book will not be useful in the future as a reference.

Classroom and Logistics

Classroom comments (if any)

Student_23150686	The computer ran really slow for the first day or two. It was better after the Microsoft updates downloaded and installed. I think the course would have gone better if the Virtual Machine images already contained the Microsoft updates. More memory might have helped as well.
Student_23150726	Computer very slow.
Student_23150848	The machines were a little slow at times and we were constantly getting warnings about activating our software.

Report Recommendations

Interpreting the Report

Below are tips to help you understand the information in the report. For additional information, please click the Help tab above the report.

Summarizes scores from each student for selected question categories and questions; compare and analyze scores for all students that completed evaluations.

Student comments provide additional insight into the scores displayed within the report.

Determine the students' overall perceived value derived specifically from training to proactively manage future training events.

Recommended Actions

Below are recommended next steps to take after reviewing the information in this report. Additionally, you'll find links to automatically run complementary reports for drilling-down further into the data or analyzing the information in another way.

If any learner rated the class much lower than others, and the learner provided an email address, follow up with that person to gather additional feedback regarding the scores. Share that feedback with instructor and course managers as areas for improvement.

If any learner rated the class much higher than others, especially in the areas of job impact or business results, follow up with those learners to gather additional feedback on how they were able to maximize their use of what they learned on the job. Share this feedback with course managers to ensure they share the knowledge with future learners to maximize job impact and business results.

Schedule this report to be emailed automatically to the course and instructor managers on a daily basis so they are able to review performance on a regular basis.

Recommended Links

Run the Learner Comments report to review all the qualitative feedback for specific approaches to make the learning more effective and impactful.

Run the Quick Question report to summarize the scale-based and multiple-choice answers for all of the evaluations.
