Comments

Instructor

Instructor Comments (if any):

Student_47421032	Instructor was great. Dealt with the grumps of students regarding the VM software by coaching and encouraging positive "give it a try" attitude.

Comments (Courseware):

Student_47421032	Training seemed broad but not deep. Would like to have had more discussion on the individual lines instead of just copy paste with no description. A breakdown (kinda like the screenshot) as to what the lines you are adding is doing would have been awesome. To have the instructor do this would be very boring and tedious but to have the software provide extra tips as to what the code is doing at my choice to read would have been awesome.
Student_47421324	There were quite some issues with VS version starting at lab 11

Classroom and Logistics

Classroom comments (if any)

Student_47420915	Several of the labs required the installation of software packages which was not feasible in the time allotted. Instructions for labs were for VS 2012 while VS 2013 was installed on the VMs. This made things interesting at times.
Student_47421032	Computer had a "smell" to it...need to clean them every once in a while. The building itself seemed to be very stinky. Like old musty smell crossed with B.O. Not very pleasant.

Report Recommendations

Interpreting the Report

Below are tips to help you understand the information in the report. For additional information, please click the Help tab above the report.

Summarizes scores from each student for selected question categories and questions; compare and analyze scores for all students that completed evaluations.

Student comments provide additional insight into the scores displayed within the report.

Determine the students' overall perceived value derived specifically from training to proactively manage future training events.

Recommended Actions

Below are recommended next steps to take after reviewing the information in this report. Additionally, you'll find links to automatically run complementary reports for drilling-down further into the data or analyzing the information in another way.

If any learner rated the class much lower than others, and the learner provided an email address, follow up with that person to gather additional feedback regarding the scores. Share that feedback with instructor and course managers as areas for improvement.

If any learner rated the class much higher than others, especially in the areas of job impact or business results, follow up with those learners to gather additional feedback on how they were able to maximize their use of what they learned on the job. Share this feedback with course managers to ensure they share the knowledge with future learners to maximize job impact and business results.

Schedule this report to be emailed automatically to the course and instructor managers on a daily basis so they are able to review performance on a regular basis.

Recommended Links

Run the Learner Comments report to review all the qualitative feedback for specific approaches to make the learning more effective and impactful.
